

Acknowledgments

I am indebted to many people who contributed to the Regres formulation and helped me understand their contributions. These include, in particular, the following individuals: John D. Anderson, James S. Border, Frank B. Estabrook, William M. Folkner, Gene L. Goltz, Ronald W. Hellings, Robert A. Jacobson, Andrew Kwok, Gabor E. Lanyi, Jay H. Lieske, E. Myles Standish, Richard F. Sunseri, James G. Williams, and Sien C. Wu of the Jet Propulsion Laboratory; X X Newhall, Ojars J. Sovers, and J. Brooks Thomas, recently retired from JPL; Jeff A. Estefan, formerly of JPL; John R. Smith, retired from JPL; and John C. Ries of the University of Texas at Austin. I am grateful to Peter J. Breckheimer, John E. Ekelund, James B. Collier, Tseng-Chan (Mike) Wang, and Dah-Ning Yuan for converting the Regres formulation to program Regres. Also, many thanks to Roger Carlson and Judi Dedmon in the JPL Technical Information section for editing and producing this document.
